

LexisNexis® IP DataDirect
Customizable bulk patent data

Support and enhance your IP intelligence with customized patent data from the industry-leading collection of enhanced first-level patent data available anywhere.

LexisNexis IP DataDirect helps support your intellectual property intelligence by offering customizable bulk patent data streams in the uniform standard XML ST.36 format for use in your proprietary patent information solutions. This service offers comprehensive and up-to-date patent data compiled from over 100 patent authorities worldwide, including 33 in full text.

IP DataDirect enables you to:

- **Improve the quality of your research and stay fully informed** by supplying your content management system with the world's largest collection of searchable full-text and bibliographic information—with images, citations, legal status, and patent family collections all in one place.
- **Get more done, more efficiently and with lower operational costs** because you no longer have to compile, convert, and upload multiple formats from multiple sources into a single, internally accessible format.
- **Stay current with up-to-date information** by accessing the latest patent data available from major patent authorities.

LexisNexis IP DataDirect is a patent data resource that offers customizable bulk patent data streams in standard format for use in proprietary, in-house data systems.
